

**PROPOSTA DI ATTIVAZIONE ADE**  
**(Attività Didattiche Elettive)**  
CdLM in Medicina e Chirurgia

<b>Titolo del Corso</b>	PanCreation – creating new experts in Pancreatology
<b>Docente, Tutor</b>	Marta Sandini
<b>CFU</b>	3
<b>Date lezioni/attività</b>	January-March 2026
<b>Modalità svolgimento</b>	<p>Modality Blended Intensive Program Five, including students from Siena, Luebeck and Vienna. Five virtual meetings 4 hours each between January and February 2026 are planned. Virtual meetings will focus on a different predefined topic in Pancreatology, and host speakers are invited to give a lecture and interact with participants at the meeting. Live surgery in classic open and minimal invasive (laparoscopic and robotic-assisted) approaches of pancreatic resections will be shared and commented.</p> <p>One week in presence in March will be finally organized, with interactive activities.</p>
<b>Contenuti Corso, obiettivi formativi</b>	<p>Pancreatic benign and neoplastic diseases are gaining more and more interests in the scientific community, due to their increasing incidence and high aggressiveness. Given the peculiarity of the pancreatic gland, an interdisciplinary management provided by a pool of specialists is mandatory. The classical academic curriculum does not include in-depth analysis of the pancreatic physiology and pathology, work-up of patients with pancreatic diseases, treatments and follow-up.</p> <p>The Program seeks to comprehend the intricate relationships that underlie the management of pancreatic patients and aims to inspire future gastroenterologists, surgeons, radiologists, pathologists, oncologists and other physicians for potential</p>

	specialization in Pancreatology, with strong focus on critical analysis of scientific literature. The Program will also grant access to an extensive network of senior and junior doctors across Europe, and create opportunity for research and inter-active work in the field around pancreatic diseases.
